Phoenix Systems UK Limited are your PCB, and contracted electronics turnkey solutions provider, for the manufacture of electronic equipment and printed circuit board assemblies, to the aerospace, defence, medical, transport, automotive, education and industrial sectors.

If you're interested, submit your CV today!

All applicants are required to email their CV to:
richardl@phoenixsystemsuk.com

PRODUCT ENGINEER

The Product Engineer will have responsibility for providing manufacturing documentation and engineering support to ensure the day to day manufacturing build requirements are met. Understanding of engineering drawings, Bills of Materials and production planning is essential

What you'll do:

- Prioritise work requiring Production Build Packs.
- Communicate any problems of an internal nature to the Lead Engineer and to communicate with Customers on problems or process issues appertaining to contracts placed with the company.
- Configuration control of all supplied documents & engineering packs
- To ensure products manufactured by Phoenix conform to customer approval requirements.
- Inputting Bills of Materials and signing off Bills of Materials inputted on Progress Plus by another employee.
- To ensure customer design changes are carried out at agreed implementation points.
- Play an active role in process improvement groups to help find the root cause of faults and eliminate them
- Support Production in analysis of product yields and trends
- NPI
- Provide design for manufacture feedback to customers and prospective customers to ensure products are optimised for assembly using Phoenix processes.
- To provide labour estimates to the sales department as required
- To help process engineering devise and implement new methods and processes to reduce manufacturing defects to zero and maximise efficiency
- Production and Quality support.
- To carry out any other duties relevant to the position

PHOENIX SYSTEMS UK LTD

PRODUCT ENGINEER

What you'll bring:

- Excellent communicator, written and verbal.
- Disciplined and controlled approach
- Strong eye for detail and the ability to maintain accurate records
- Responsive
- Must be able to work under own initiative to solve problems.
- Highly motivated and able to motivate others to achieve
- Calm and collected, with the ability to work in a busy environment
- Good interpersonal skills

Essential:

- Excellent comprehension of engineering drawings, Bills of Materials, good PC skills and record keeping

Desirable:

- Previous experience of an Engineering role in a CEM
- A good broad based knowledge in the recognition and handling of electronic components and sub-assemblies

Why Phoenix Systems?
