# PRODUCT ENGINEER

The Product Engineer is to be responsible for providing manufacturing documentation and engineering support to ensure the day to day manufacturing build requirements are met. The Product Engineer will have responsibility for delivering timely and accurate manufacturing documentation to enable production to meet the manufacturing plan, born out of regular communication with the Lead Engineer.

## What you'll do:

- **Prioritise work requiring Production Build Packs.**
- **Communicate any problems of an internal nature to the Lead Engineer and to communicate with Customers on problems or process issues appertaining to contracts placed with the company.**
- **Configuration control of all supplied documents & engineering packs.**
- **To ensure products manufactured by Phoenix conform to customer approval requirements.**
- **Inputting Bills of Materials and signing off Bills of Materials inputted on Progress Plus by another employee.**
- **To ensure customer design changes are carried out at agreed implementation points.**
- **Play an active role in process improvement groups to help find the root cause of faults and eliminate them.**
- **Support Production in analysis of product yields and trends.**
- **NPI**
- **Provide design for manufacture feedback to customers and prospective customers to ensure products are optimised for assembly using Phoenix processes.**
- **To provide labour estimates to the sales department as required.**
- **To help process engineering devise and implement new methods and processes to reduce manufacturing defects to zero and maximise efficiency.**
- **Production and Quality support.**
- **To carry out any other duties relevant to the position.**
- **Internally I liaise with personnel within Purchasing, Process Engineering, Production, MPS and Quality.**
- **Externally interface peer to peer with customers and LRQA assessment personnel.**

# PRODUCT ENGINEER

## Qualifications & Essentials:

- Previous experience of an Engineering role in a CEM.
- Excellent comprehension of engineering drawings, Bills of Materials, good PC skills and record keeping.
- A good broad based knowledge in the recognition and handling of electronic components and sub-assemblies.
- Individuals will be expected to undertake a trade test to confirm possession of the required skills.

## What you'll bring:

- Excellent communicator, written and verbal.
- Disciplined and controlled approach.
- Strong eye for detail and the ability to maintain accurate records.
- Responsive.
- Must be able to work under own initiative to solve problems.
- Highly motivated and able to motivate others to achieve.
- Calm and collected, with the ability to work in a busy environment.
- Good interpersonal skills.

## Why Phoenix Systems?
